THESAURUS GRALAND

For nearly two decades you have taught French at Graland with enthusiasm and fondness both for the language and for your students. You have given your students a lasting enthusiasm for your subject through Graland's participation in the University of Denver Language Festival, through French play productions, through cultural enrichment, and, most of all, through your superb teaching. It is with a sense of gratitude and affection that the THESAURUS staff dedicates this annual to you COLETTE GUIBERTEAU.

GRADUATING THOUGHTS

On September 7, 1976, the graduating class of 1977 became this year's ninth grade. During the course of the years, our class has shared many experiences, some good, some bad, but all of them memorable.

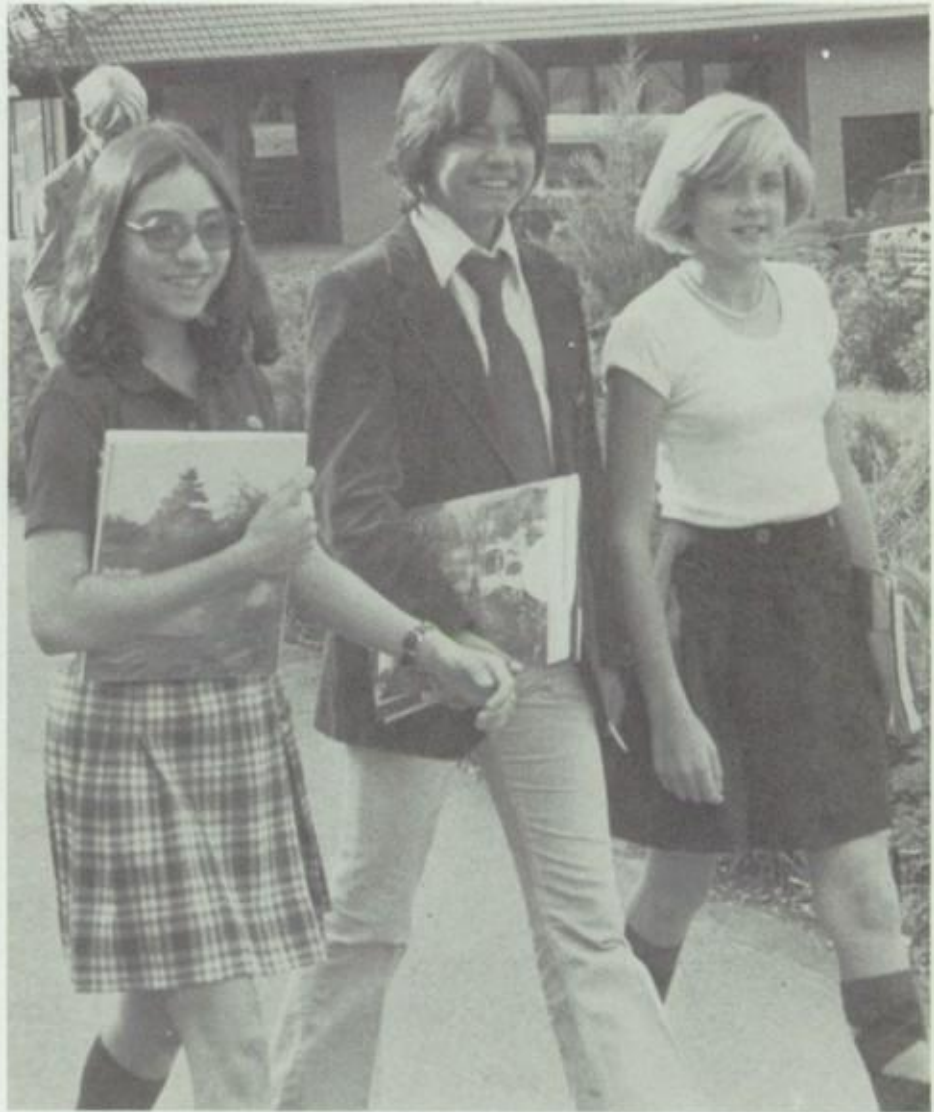

Most of us remember the Lower School field trips, the Fourth Grade Operetta about Greek mythology, and the Fifth Grade Knighting. We also recall the Sixth Grade Estes Park science trip, the Southwest history trip, and the Eighth Grade trip to Cripple Creek and Leadville. More recently we recall our Ninth Grade trip to the Sand Dunes, the "romantic" dances, and Dr. Hambidges zinc experiment with the ninth grade students as guinea pigs.

We also owe many thanks to Graland for the incredible education which we have received through its skilled faculty, and for the learning experiences we have shared.

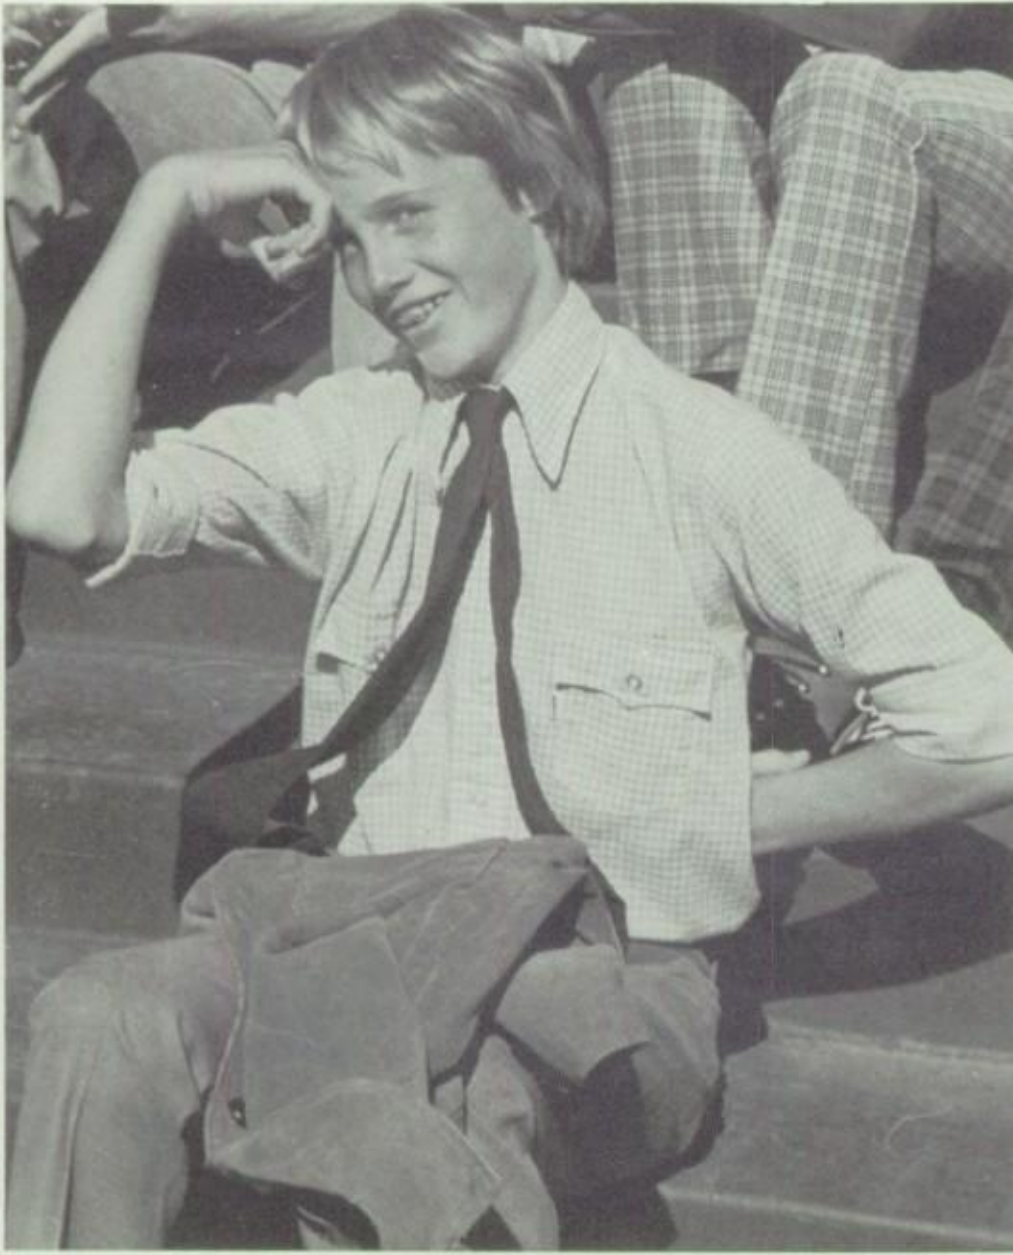

Most importantly though is the fact that most of us have been together for quite awhile; there are even those who have been at Graland for the entire eleven years possibly. But no matter how long one of our classmates has been here, we are all very close and we will all miss each other after Graland.

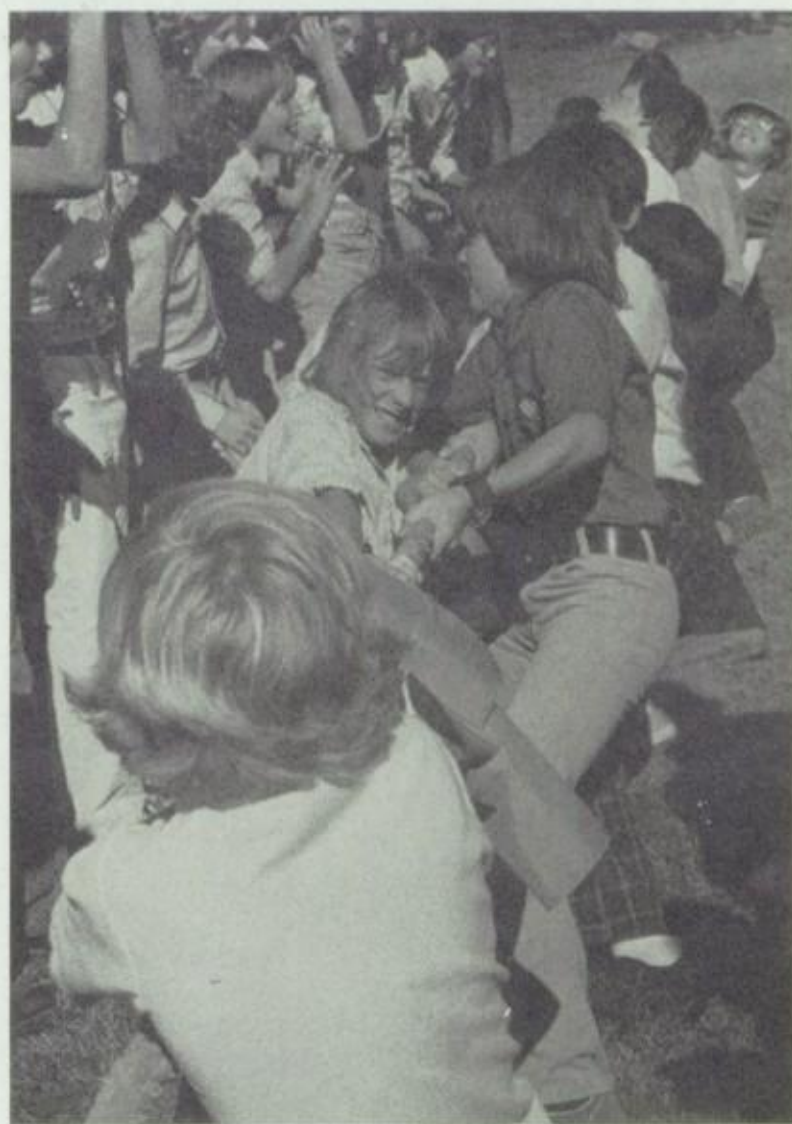

As Graland celebrates its fiftieth birthday, the THESAURUS would like to make its contribution. The aerial photograph of Graland on this page is over thirty years old. On the following six pages and on other pages scattered throughout this book you will discover photographs which will compare life at Graland then and now. We hope you will find as much pleasure in them as we did in our initial discovery of the negatives and prints.
